EDUCATION

University of Manitoba
Bachelor of Computer Science

Winnipeg, MB
Jan 2023 – Present

EXPERIENCE

Freelance Full Stack Web Developer 2019 – Present
https://www.fiverr.com/flake_webby

- Delivered 300+ production-ready web applications for international clients with consistent 5-star ratings and repeat business
- Adapted to diverse client environments and team structures, working across varying requirements, workflows, and collaboration styles
- Collaborated with global clients and cross-functional teams, translating complex requirements into scalable technical solutions
- Architected and delivered production-grade full-stack systems, designing robust backend services and high-performance, interactive frontends

Co-Founder & Lead Developer — WebQA 2021 – Present
<https://webqa.co>

- Founded and developed a production-grade SaaS platform for automated website auditing, delivering end-to-end analysis across SEO, performance, and security
- Architected a scalable crawling and analysis system to extract, process, and evaluate website data across multiple technical layers
- Integrated external APIs including Google PageSpeed to deliver real-time performance insights and benchmarking
- Designed and implemented advanced diagnostic modules covering metadata analysis, security headers, accessibility, and site structure
- Built a high-performance reporting dashboard to visualize website health and provide actionable optimization insights

PROJECTS

CoronavirusPak | *Laravel, PHP, REST APIs* | github.com/abdulmoeez/coronaviruspak 2020

- Developed a web platform to provide COVID-19 information including symptoms, prevention, and public health guidance
- Implemented a self-assessment tool to help users evaluate potential COVID-19 symptoms
- Integrated external APIs to fetch and display real-time COVID-19 data and statistics
- Organized content through blogs, tracker maps, and structured information pages

Cupello Tactics Board | *React, Fabric.js* | cupello.com/features/training-planner 2023

- Developed an interactive football tactics board for real-time strategy visualization
- Implemented drag-and-drop player controls and drawing tools using canvas-based interactions
- Managed application state and UI updates using React for a responsive user experience

TECHNICAL SKILLS
